An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The claims have been amended as follows:

34. (currently amended) A ~~process~~ method according to claim 1, wherein the lignocellulosic pulp is additionally bleached with sodium dithionite.

### ***Allowable Subject Matter***

Claims 1-19, 21-24, and 34 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or suggest bleaching and stabilizing the brightness of a lignocellulosic pulp in an aqueous medium with any of the claimed water soluble phosphine or phosphonium compounds.

The prior art teaches using certain phosphine or phosphonium compounds as a chelant, surfactant, or catalyst in connection with a pulp bleaching process or as a stabilizer against photodegradation of paper, but does not suggest using the claimed compounds as pulp bleaching agents.
